

TANDBERG Video Solutions for the Justice System

As budget pressures, court cases, inmate population and public safety concerns grow, courts and correctional systems turn increasingly to visual communications to help lessen these pressures. A growing number depend on TANDBERG video solutions as standard communications tools. Their popularity will continue to increase as the halls of justice look to TANDBERG's new suite of products, the first designed for the justice system.

TANDBERG delivers proven, reliable, and easy-to-use solutions that help justice organizations fulfill public expectations and bridge the distance gap through visual communications.

Video communications delivers numerous benefits and applications

By law, justice communication must be visual. So seamless, natural, secure, reliable and interactive video communications are essential. Courts and correctional facilities with TANDBERG video systems discover they can:

- Expedite cases faster through the system
- Schedule and conduct hearings more efficiently
- Minimize inmate transportation costs
- Help inmates through telemedicine and with pre-release resources
- Maximize prison and jail personnel resources
- Reduce security risks related to inmate movement
- Improve visits between inmates and their families

Progressive court and correctional officials sparked the technology movement within the justice system.

Globally, more justice managers are incorporating visual communication. In the U.S. alone, more than 500 state courtrooms nationwide, 900 federal courtrooms and a small but growing number of correctional facilities have jumped on the video bandwagon within the past decade. The variety of video applications include:

- | | |
|--|----------------------------------|
| Arraignment proceedings | Parole hearings |
| Settlement conferences | Consideration of appeals |
| Bail hearings | Cross-jurisdictional hearings |
| Motions and non-evidentiary hearings | Mental-health hearings |
| Depositions | Medical appointments for inmates |
| Sensitive witness & expert testimonies | Remote visitations |
| Attorney consultations | Inmate rehabilitation programs |
| Continued education for staff | Pre-release assistance |

TANDBERG tempts justice organizations to imagine the video possibilities

Providing years of innovative video products and expertise, TANDBERG designs tailored solutions for the judicial sector incorporating invaluable input from judges, court clerks and correctional experts. These interactive solutions - all of them secure and durable, seamless and natural -- simplify and expedite judicial and correctional processes and let judicial management envision and secure new courtroom and correction opportunities.

In the courtroom, with TANDBERG's space-efficient and easy-to-employ Justice Package, judges maintain their essential control. And a mobile, extended-height cart and monitor near the witness box helps retain the familiar in-person feeling and room configuration. This modular package with its varied options connects with existing sound systems and presentation equipment.

Correctional facilities rely on TANDBERG's SL Series and Visitation Solution.

- The SL Series gives prisoners remote but full access to their judicial rights, and the highly durable system also withstands the most taxing environments.
- The Visitation Solution enables families and attorneys to meet with inmates without even entering the correctional facility.

TANDBERG's judicial solutions are simple to use, highly reliable, easy to install and expandable as needs dictate. TANDBERG also offers medically tested and approved video solutions for medical-intake evaluations and other telemedicine applications. Further, TANDBERG furnishes a variety of video-communications systems for attorneys' offices and medical facilities.
